

# Who's Gambling With Your Retirement?

# **“We need to safeguard hard earned retirement savings for all Americans.”**

**– Bart Gordon**

## **Restoring Trust**

- Allow people to diversify their private retirement accounts.
- Require faster and more complete public disclosure for insider trading.
- Permit employees to sell stock provided by their companies.

## **Maintaining Accountability**

- Ensure employees have the same rights as corporate executives.
- Penalize companies that misrepresent their finances or mislead employees and investors.
- Strengthen oversight of accounting industry.

## **Saving Social Security**

- Preserve Social Security as a risk-free retirement nest egg
- Develop incentives encouraging additional retirement savings.

# Bart Gordon – Staying In Touch

The collapse of Enron and the personal devastation it has caused for thousands of employees and stockholders across the nation should cause us all to take a closer look at our retirement plans. Millions of workers depend on 401 (k) plans, IRAs, pensions and Social Security to provide for a safe and secure retirement.

I will be working with my colleagues in a bipartisan fashion to help restore trust and corporate accountability for the money you work so hard to earn and invest for retirement. Pensions, retirement savings and Social Security are the three legs upon which a safe and secure retirement rests. No American should have to suffer the fate of the good employees of Enron.

I am conducting open meetings in March as part of my ongoing effort to stay in touch. I hope you can join me to discuss retirement security or other issues of concern to you or your family.

Stay in touch,

*Bart*
